

MARINE LIFE

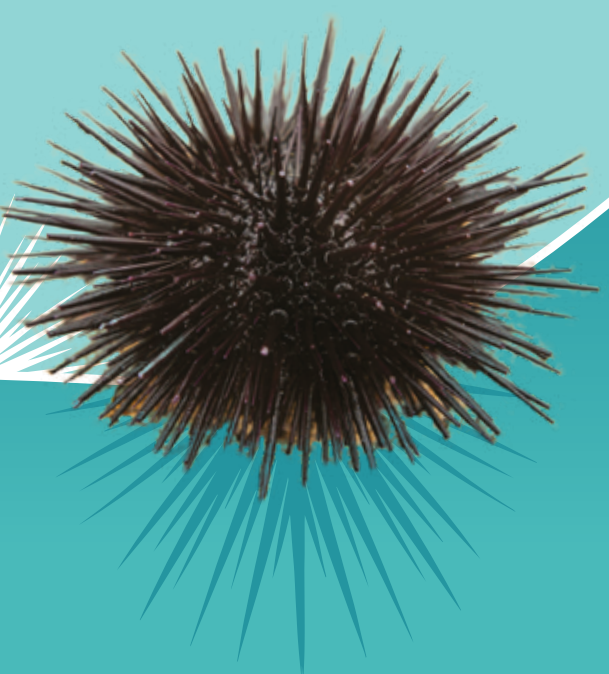

WHILE SNORKELING, YOU CAN MEET EXTRAORDINARY CREATURES:

DAMSELFISH

SEA URCHIN

STARFISH

PEARLY RAZORFISH

OCTOPUS

MEDITERRANEAN SEA

Within the Marine Protected Area of Capo Testa – Punta Falcone, with the project SEATY we have created a Local Marine Education Area. Thanks to this project, the beautiful beach of Rena Bianca and its coasts have become a platform for those who visit or live here to get to know the sea and thus learn how to take care of it. **Are you ready to dive with us?**

Follow the signs to discover marine biodiversity in and out of the water: take part in our many free activities including informational events, beach cleanings and yoga lessons at sunset and take part on a snorkeling tour guided by a marine biologist to learn about marine biodiversity.

SEATY is a project by:
